

PUNEETHA G

Artificial Intelligence & Machine Learning | AI Research | LLMs | Computer Vision
+91 7483238339 | puneethag21@gmail.com | LinkedIn | GitHub | Portfolio | Mangalore, Karnataka, India

Summary

AI/ML undergraduate focused on Large Language Models, Computer Vision, deep learning and intelligent products. Experienced in building transformer-based language models, ML systems, computer-vision applications and full-stack AI products. Active in hackathons, FOSS communities and technology leadership, with a strong interest in advanced AI research and AGI.

Skills

Programming	Python · C · C++ · Java · JavaScript · TypeScript · HTML · CSS
AI / ML	TensorFlow · PyTorch · Scikit-learn · Hugging Face · LLMs · Computer Vision · YOLO · OpenCV
Data	NumPy · Pandas · Matplotlib
Web / Backend	React · Next.js · Node.js
Databases / Tools	MongoDB · Firebase · Git · GitHub · Linux · VS Code

Education

Srinivas Institute of Technology, Valachil, Mangalore	2025 – 2029
B.Tech in Artificial Intelligence & Machine Learning	CGPA: 8.5/10 (85%)

Projects

124M-Parameter Transformer Language Model	AI Research / Deep Learning
- Designed and trained a 124M-parameter GPT-style language model with 12 transformer layers, 12 attention heads and 768-dimensional embeddings. - Built the training and checkpointing workflow using approximately 410M training tokens, working with tokenization, optimization and model evaluation.	
SatQuery AI — Satellite Intelligence	AI / Computer Vision
- Developed an AI concept for natural-language questions over satellite imagery and identifying changes between images. - Designed a workflow combining satellite imagery, image-difference analysis, computer vision and vision-capable AI for geospatial intelligence.	
Traffic & Real-Time Object Detection	YOLO / OpenCV
- Built real-time computer-vision systems using YOLO and OpenCV for object detection and traffic-related analysis. - Worked with custom object-detection workflows, model inference, image/video processing and dataset experimentation.	
Hand Gesture AI	Computer Vision
Developed a real-time hand-gesture recognition system using Computer Vision and OpenCV for camera-based interactive applications.	
ZEO AI — AI Product & Research Initiative	AI Product / Full Stack
- Building an AI-focused technology initiative developing intelligent products and exploring advanced AI research. - Developing web-based AI products with Next.js, React, Node.js, Firebase and MongoDB, while exploring healthcare, assistants, computer vision and AGI research.	

Leadership & Community

- Google Student Ambassador** — Technology community activities, learning initiatives and student engagement.
- Event Lead, Nexus** — Srinivas Institute of Technology. Lead and coordinate technology-focused events, technical sessions and student activities.
- Member, The IO Foundation (Argos Club)** — Participate in an international technology community focused on digital rights and internet governance.
- ML Club Leadership** — Lead and contribute to ML activities, technical sessions, project development and student collaboration.

Hackathons & Community

Participated in AI/ML, Generative AI, FOSS and technology hackathons and community events. Worked on projects involving LLMs, computer vision, satellite imagery, AI assistants and intelligent systems. Interested in open-source AI research and emerging AI architectures.

Key Achievements

124M-Parameter LLM Built and trained a transformer language model with 124M parameters and approximately 410M training tokens.	AI Product Builder Building ZEO AI as an AI product and research initiative focused on intelligent systems.	Technology Leadership Google Student Ambassador, Nexus Event Lead, ML Club leadership and IO Foundation Argos Club member.
